

# 9RX

**JOHN DEERE**

NOTHING RUNS LIKE A DEERE

# FARM STRONGER

Our 9RX 710, 770, and 830 are the world's most powerful production tractors. They have your back with the strongest pulling performance you have ever experienced, unmatched precision ag capabilities, and visionary cab comfort and controls. Embrace the power of the 9RX series and elevate your farming to unprecedented levels of strength and efficiency. Experience how you can farm stronger now.

# 9RX

**830 770 710**

913 HP MAX POWER 847 HP MAX POWER 781 HP MAX POWER

# PERFORMANCE BEYOND LIMITS

The engine and the hydraulic system of the new 9RX outperform everything. The 18-litre displacement JD18X engine is the most powerful engine we've ever built. It delivers 913 productivity-boosting hp at low specific fuel consumption with up to 4234 Nm of torque in the top model. Its straightforward, reliability-focused design and horsepower class require no Diesel Exhaust Fluid (DEF), and the optional Intelligent Power Management (IPM) provides up to 40 additional hp on demand for power-hungry hydraulic-driven implements.

### COOL EFFICIENCY

Conserve energy with our reversible fan, designed to keep the hood's air intake panel clear of debris.

# FAST REFUELLING

Imagine refilling the entire 1,952-litre\* Diesel tank in under 4 minutes with the Fast Fuel System. Without the Fast Fill Option, you can easily reach the filler neck from the ground.

\* Tank capacity may vary by country

# TRUE POWER

Triple hydraulic pumps with a maximum flow of up to 636 l/min make sure that you never have to compromise on tractor or implement performance.

### MORE UPTIME

Enjoy full Stage V compliance with no need for Diesel Exhaust Fluid (DEF) and get more uptime at lower costs, thanks to extended 4,000-hour hydraulic oil service intervals.

# POWER WHERE IT COUNTS

The 9RX has everything it takes to bring its massive power to the ground. The combination of the JD18 engine with the new e21™ PowerShift™ transmission and the redesigned undercarriages guarantee unmatched drawbar pulling power.

### e21™ TRANSMISSION

The e21™ PowerShift™ transmission is engineered to seamlessly harness the high power and torque of the 9RX. Its purely mechanical drive keeps power losses extremely low, and the 21 gears feature close gear spacing so that you can always set the right speed for the work you're doing.

### NEW UNDERCARRIAGE

The new larger drive sprocket has a diameter of 1,200 mm. Combined with the longer wheelbase, we attain a spectacular wrapping angle of 110° and 7.5 drive lug engagement – critical factors for effectively transferring power and torque to the ground!

# 0.58

**KG PER CM<sup>2</sup> MIN. STATIC GROUND PRESSURE**

The large footprint of the tracks with three mid rollers establishes a benchmark. Even when fully ballasted at 38,100 kg, the static ground pressure is as low as 0.58 kg per cm<sup>2</sup>, ensuring unparalleled traction in all load conditions and keeping soil compaction to a minimum.

## VISIONARY COMFORT, EFFORTLESS CONTROL

The feeling of working in the CommandView™ 4 Plus Cab is beyond mere words. So let's have numbers do the talking: +20% right-side visibility and +15% floor space will give you an unprecedented sense of space. Thanks to the cab suspension with three degrees of freedom and ActiveCommand Steering (ACS™), piloting the 9RX almost feels like floating across the fields.

# ROOM WITH A VIEW

Effortlessly mount the CommandView™ 4 Plus Cab thanks to the 65° angled step design, sit down, and enjoy more visibility and space than ever before.

## FIRST-CLASS COMFORT

Outfitted with a sophisticated cab suspension with three degrees of freedom, the 9RX boasts an isolated subframe, effectively reducing the noise and high-frequency vibrations typically associated with road transport. In the field and on the road, these tractors provide unmatched ride quality and pure driving joy.

## ACTIVECOMMAND STEERING (ACS™)

Unique to John Deere, ACS™ adjusts the effort required to turn the steering wheel based on the ground speed. As a result, the 9RX is easier to steer at low speeds and feels rock-solid at higher speeds. Your headland turns will become much swifter, as it takes a mere 3.5 turns from lock to lock. On the road, the steering ratio changes to 5 turns lock-to-lock to improve control, and on slopes, you'll find it a lot easier to hold a straight line.

# IT'S ALL THERE

The new 9RX is more than just a tractor: With the G5<sup>Plus</sup> CommandCenter™, the StarFire™ Integrated Receiver, and JDLink™ Connectivity, it already has everything on board for your quick and effortless start into precision agriculture. Add the free-of-charge John Deere Operations Center™ and you are 100% equipped to step into the future of farming.

## PROFESSIONAL DEALER SUPPORT

Our dealers have made significant investments in their precision ag specialists. Equipped with extensive knowledge and experience, they will be your reliable partners in getting you started on your smart farming journey, helping you set up your systems and showing you how to use them. With your permission, they can also monitor your machines throughout the year and help you optimise performance.

### G5<sup>PLUS</sup> COMMANDCENTER™

Information has never looked this beautiful. On a massive 12.8" touchscreen display, the G5<sup>Plus</sup> CommandCenter™ includes **AutoTrac™**, **Section Control** and **Variable Rate Control**. **1-Click-Go-AutoSetup** automatically shows pre-planned tasks when the tractor enters the field for swift execution. You'll also benefit from full **AEF ISOBUS compatibility**, **JDLink™ Connectivity**, **Documentation** and **Data Sync** as standard features to immediately boost your performance.

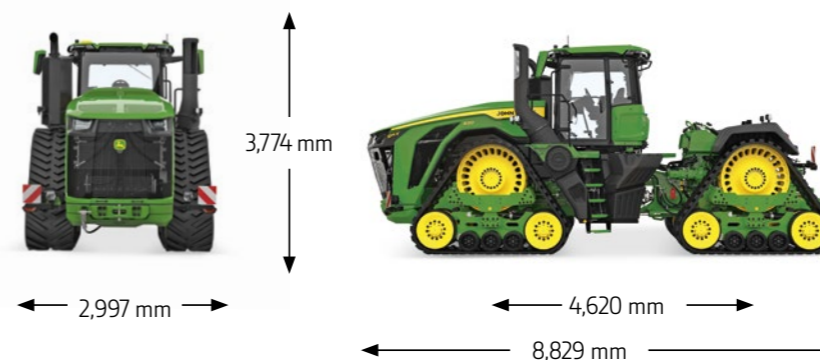

### STARFIRE™ INTEGRATED RECEIVER

Thanks to the **StarFire™ Integrated Receiver's** ability to communicate with GPS, GLONASS, and the new GALILEO and BEIDOU satellite constellations, you'll enjoy superior signal stability in shaded areas at any signal accuracy level. While our standard SF1 differential correction signal is suitable for many applications, our new StarFire™-RTK Satellite signal provides 2.5 cm pass-to-pass accuracy over five years of precise repeatability, and rapid initialisation to acquire full accuracy without the cost of previously required RTK components and activations.

### OPERATIONS CENTER: FREE OF CHARGE

The John Deere Operations Center™ is the central platform for connecting your machines, operators, and fields. Plan your work and send all job information directly to individual machines to eliminate in-field setup delays and mistakes. You can also create prescription maps with affiliated software partners and easily import data. In addition, dealer specialists are available to support you in enhancing your farming sustainability and profitability.

**33,500 KG BASE WEIGHT**

The tractor's total width is in accordance with the registration requirements of most European countries. Speak to your dealer for details.

# THE NEW 9RX 830

- 610 KW/913 HP MAX POWER
- 4234 NM TORQUE
- 1952-LITRE\* DIESEL TANK AND NO DEF
- 636 LITRE/MIN HYDRAULIC FLOW
- 0.58 KG/CM<sup>2</sup> MINIMUM STATIC GROUND PRESSURE
